

# Day of Europe

On the 10th of May, Mirador del Genil celebrated the day of Europe. Many amazing activities took place during the day and everyone seemed to have a brilliant time.

To begin the day, the whole school accompanied by some English visitors made their way to the front gate to listen to the school's band. The band played and sang in English, Spanish and even French. Afterwards, years 3 and 4 either watched videos about the United Kingdom or did an activity on body expression, whilst the students from year 1 and 2 went into groups and took part in a competition called 'Yincana del conocimiento'. The Yincana is a form of game in which players run around the school going into designated classrooms and doing activities or quizzes about each of the subjects they take. In each subject every team were given a score normally from 1 to 5 and the team with the most points won. After an hour the students from years 1 and 2 went and watched the videos or the activity on body expression whilst the year 3 and 4 students did the Yincana.

After the break, there was the Garcia Lorca concert organized by Marina the music teacher. The concert was a mind-blowing experience with an amazing flamenco dancer, a singer who had a close to perfect voice and our own brilliant Marina playing piano. During the concert a lot of the teachers and a few students went to help supervise the control of the race which took place after the concert. The circuit involved going around the new part of the town and making its way towards the lake then back towards the school. The circuit was 2km long and 1st and 2nd year were expected to go around once but those from years 3 and 4 went around twice, running a total of 4km. Finally, for the last hour it was tasting time. During the week the students had made a variety of English, French and Spanish dishes and now finally it was time to taste them. Many British people also joined us at the school for the last hour and tasting time.

It was an amazing day that was only made possible by our brilliant teachers and everyone seemed to really enjoy it. I hope next year is just as good.
